PART 1 - GENERAL PROVISIONS

Definitions [Reference 36 CFR §1.4]

Cave (s) - Any naturally occurring void, cavity, recess, or system of interconnected passages which occurs beneath the surface of the earth or within a cliff or ledge (including any cave resource therein, but not including any vug, mine, tunnel, aqueduct, or other man-made excavation) and which is large enough to permit an individual to enter, whether or not the entrance is naturally formed or man-made. This will also include any natural pit, sinkhole, trench, collapsed lava tube, or other feature which is an extension of the entrance.

Climbing - Ascending or descending rocks with the aid of any equipment including, but not limited to, ropes, anchors, bolts, picks,

Contained Fire - A fire kindled in an established fire grate or in a portable fire/cooking container which serves to contain all flame, fuel, ash and debris from all contact with the ground or other materials outside the container. This includes propane cook stoves, barbeque grills, sterno stoves and other such approved devices.

Hunting Camps - A camp where the individuals are legally hunting, scouting and/or supporting legitimate hunting operations on lands bordering National Park Service property.

Information Center Complex - All of the buildings, supplies, materials and infrastructure in the general location of the Information Center located at 11,000 Ice Caves Rd, Grants, NM, which is located on the southwest side of NM Hwy 53 at about mile post 64. This includes the parking lot, fire cache, fire storage buildings, maintenance shed, pump-house, the brown cabin and all other associated infrastructure.

Northwest New Mexico Visitor Center Complex - All of the buildings, supplies, materials and infrastructure in the general location of the Northwest New Mexico Visitor Center located at 1900 E. Santa Fe Ave, Grants, NM. This includes the entrance road, parking areas, the NPS "bone yard" of excess supplies and materials, and all other associated infrastructure.

Park Road - Park road means the main-traveled surface of a roadway open to motor vehicles, owned, controlled or otherwise administered by the National Park Service. (As defined in the CFR.) This also includes two-track roads which are further defined and described in this section.

Northwest Tracts - The "Northwest Tracts" are tracts of real property which the National Park Service has purchased. The tracts contains physical improvements such as residences, storage sheds, and other physical improvements. These tracts are located north of New Mexico Highway 53, (T9N, R12W, Sections 14 & 15), in the northwest portion of the Monument.

Special Park Uses - As defined by Director's Order 53 a "special park use" is:

A short-term activity that takes place in a park area and

- T Provides a benefit to an individual, group or organization, rather than the public at large;
- T Requires written authorization and some degree of management control from the NPS in order to protect park resources and the public interest;
- T Is not prohibited by law or regulation; and
- T Is neither initiated, sponsored, nor conducted by the NPS.

Two-track road - An un-maintained "park road", as defined in **36 CFR §1.4**, which is completely void of vegetation in the tracks, which shows use, and shows no evidence of ever having been closed to vehicular traffic by such means as berms, ripping, scarification, re-seeding, fencing, gates, barricades, or posted closures

Pack animal - Horses, burros, mules, other hoofed mammals and llamas.

Written justifications for closures and public use limits [Reference 36 CFR 1.5(c)]

Cave(s): The majority of caves in the monument have not yet been surveyed to determine what resources they contain, how delicate those resources may be, and/or if they are safe for public use. Until such time as a survey is completed and a determination is made as to whether the caves are safe for public use and whether or not that public use will negatively impact or damage natural or cultural resources, cave access will be by permit only.

During the spring and summer months, a colony of Townsend's Big Eared bats (*Corynorhinus townsendii*) are observed in the collapses and bridges preceding the entrance to Braided Cave. Entry to the cave is through these collapses. Townsend's Big Eared bats are listed as threatened species in the state of New Mexico and are a species of concern by the USFWS. A USGS bat survey of the monument recommends closing Braided Cave seasonally to protect the maternity colonies. Therefore, Braided Cave will be closed seasonally as posted.

Additionally, flames and other heat producing devices in caves are destructive to fragile biological and geological resources, therefore, items such as gas lanterns, candles, torches, and all similar products and devices are prohibited. Only battery powered light sources 50,000 Candlepower or less, or other fully enclosed and sealed light producing items such as glow-sticks are authorized for use in caves.

Climbing: For the same reasons listed above in Caves (safety & protection of resources) climbing is prohibited. Additionally, the management of the Monument recognizes many of the areas where climbing may occur have significant cultural value to neighboring Native American Indians and climbing activities may conflict with cultural activities and sacred sites which the Monument was, in part, established to protect.

Fires: El Malpais National Monument is mandated to manage resources to minimize human impacts and protect natural and cultural resources. Unplanned and managed ground fires have been determined to adversely effect the resources of the area through the gathering of rare old wood which is valuable for study, the damage and destruction of cultural/archeological resources, the damage and destruction of pristine geological and sensitive biological resources, in addition to increasing the potential of catastrophic wildfire. Therefore, non-National Park Service planned and managed ground fires are prohibited. Only fires which are contained in established grills or a similar containerized devices are permitted.

Gathering, by hand, of edible fruits, nuts and berries for personal consumption: The quantities of ten (10) pounds of piñon and one quarter (1/4) pound of berries, per person per day is a nominal quantity of these resources available in the Monument and therefore will not unduly affect the propagation of the species nor deprive the natural wildlife of sustainable browse.

Information Center Complex: The U.S. Government has substantial interest in buildings, materials, equipment and supplies in the structures and work areas of this location, consequently, it is necessary

to limit public use of this area to ensure the protection of the public and government interests. Therefore, public access to these buildings and areas is hereby limited to those days and hours where NPS personnel are available to staff the Information Center and thereby provide necessary security and oversight of these facilities.

Northwest New Mexico Visitor Center Complex: The U.S. Government has substantial interest in buildings, materials, equipment and supplies in the structures and work areas of this location, consequently, it is necessary to limit public use of this area to ensure the protection of the public and government interests. Therefore, public access to these buildings and areas are hereby limited to those days and hours where government employees are available to staff the Northwest New Mexico Visitor Center and thereby provide necessary security and oversight of these facilities.

Northwest Tracts: The portions of the Monument which comprise the "Northwest Tracts" are tracts of once private property which the government has acquired and have physical improvements to the land. Physical improvements range from residences, barns, storage sheds, wells, etc. These improvements are unsafe for public access as they are rodent infested, of sub-standard construction, and often contain hazardous materials. Therefore, they are all slated for destruction. These sites will remain closed to public access until such time as the government is able to clean up or mitigate the safety issues in the area.

Operation of Motor Vehicles: Operation of vehicles, off Park Roads and two-tracks, destroys delicate natural and cultural resources which the Monument was established to protect. Therefore, driving is prohibited more than 10 feet off a designated Park Road or two-track.

Additionally, the roads and terrain of the Monument are rough and may become hazardous depending on weather and conditions. Therefore, having a properly equipped vehicle which is licensed and registered for use upon state and federal highways, is insured in compliance with state law, and is operated by a licensed operator is necessary to protect public safety along with the natural, cultural and scenic values of the Monument. This definition includes motorcycles and ATV's.

Sandstone Bluffs Overlook & Parking Area: When El Malpais National Monument was established, Sandstone Bluffs was locally known and popular as a party spot. There were frequent parties where large quantities of alcohol were consumed resulting in trash and debris thrown around the area and over the cliffs, fire scars were left on the rocks, and other resource damaging activities occurred. In association with the large quantities of alcohol consumed there was aberrant and deviant behavior that intimidated other individuals from visiting the area after dark. Therefore, closure of the area after dark is necessary to protect natural & cultural resources, development, and the visiting public.

Road 100(A) as a bicycle route: Road 100(A) is designated as a route open to bicycle traffic. Road 100(A) is an old road in the El Calderon developed area which was closed to vehicle traffic in 1999. It was closed to limit vehicle access to private lands which border the Monument, and because the roads on the Bureau of Land Management (BLM) lands had deteriorated to the point of being unsafe for vehicle travel. However, the road remains an acceptable route for bicycle riders to access the BLM lands.

Closures and Public Use Limits [Reference 36 CFR 1.5(a)(1) & (a)(2)]

Visiting Hours:

Sandstone Bluffs Overlook and Parking Area: Visiting hours for the Sandstone Bluffs Area are from sunrise to dusk, unless otherwise authorized by permit from the Superintendent.

Information Center Complex: Visiting hours for public use of the Information Center Complex are daily between 0830-1630 hours, unless otherwise authorized by a permit from the Superintendent or by authorized special postings. This area will be closed on Thanksgiving, Christmas and New Years day.

Northwest New Mexico Visitor Center (NWNMVC) Complex: Visiting hours for public use of the Northwest New Mexico Visitor Center Complex is seasonal in nature and dependent upon available staffing. However, hours of visitation will be between 0800-1800 hours. Specific hours for a season or day will be posted on the NWNMVC entrance sign and will be confirmed by the open or closed and locked gate at the entrance from Santa Fe Ave. Other public uses of this facility and area may be authorized by a permit from the Superintendent. This area will be closed on Thanksgiving, Christmas and New Years day.
